DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15, 17-18, and 23-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. The phrase "a silyl, stannyl or phosphorous containing group" in the definition of R3 is indefinite. All this says is that the groups contains Si, Sn or P somewhere, somehow, but says nothing about the actual structure of the group. It does not for example require that the group be bound via that atom. There is no way of knowing what these groups look like. The traverse is unpersuasive. Applicants have pointed to the specification page 3 text says that R3 is "an ester-forming carboxyl-protecting groups" . However, the PTO does not read unexpressed limitations into the claims, *In re Kebrich*, 96 USPQ 411, 413. Similar is *In re Winkhaus*, 188 USPQ 129: "We will not read into claims ... limitations from the specification." Note also *In re Prater*, 162 USPQ 541, 550 and *Intervet Am., Inc v. Kee-Vet Labs., Inc.*, 12 USPQ2d 1474, 1476. MPEP 2164.08 states, "Limitations and examples in the specification do not generally limit what is covered by the claims." Applicants also state that "breadth of a claim is not to be equated with indefiniteness." The examiner is not saying that it does. The problem here is that the group is not defined at all, except that somewhere there is a Si, Sn or P atom.

2. Claim 24 depends on now canceled claim 16.

Claim Objections

The claim wording for claim 24 is not ideal. First, tartaric acid is:

. Thus a tartrate boronate would correspond to Ra and Rb as being COOM, where M is the esterifying group, here, alkyl. But the claim then goes on to specify these as "alkylcarboxylate" which is technically, alkyl-C(O)O- (e.g. acetate), which is inconsistent with the above. What applicants intend is alkoxycarbonyl, which one of ordinary skill in the art could figure out from the generic definition. Thus, the claim language of alkoxycarbonyl is suggested.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
